Notes:

- **Actual funding allocations** are calculated using the final Schooling Resource Standard (SRS) indexation factor that applies to that year. The SRS indexation factor for the year is finalised around August of the year. The timing of payments relating to final funding allocations for a year are subject to the Minister's determination and may be made in the six months following the end of that year.
- **Estimated funding allocations** are subject to state and territory distribution variations agreed to by the Minister and updates to the projected SRS indexation factor for each year. Estimates from 2026 onwards currently apply the minimum guaranteed indexation rate of 3.4 per cent.
