Domestic full fee paying students^(a) in award courses at public universities^(b)

- The total number of domestic full fee paying students at public universities in 2006 was 121,231. This represents a decrease of 2.2% (or 2,774 students) from 2005 figures.
- In 2006, only 2.5% of all domestic undergraduate students were full fee paying. This proportion has remained steady at this level since 2001. Of domestic postgraduate students in 2006, 60.7% were full fee paying, declining from 67.2% in 2004 and 64.6% in 2005.
- Domestic full fee paying students undertaking undergraduate courses have increased by 14.6% between 2005 and 2006, whereas domestic full fee paying students undertaking postgraduate study have decreased by 4.0% over the same period.

(a) Full fee paying students are those with only fee paying units of study (excluding summer school) in an award place (i.e. excluding enabling and non-award units of study). These include both tuition fee liable and tuition fee exempt students.

(b) Public universities are all Table A providers.

NB: In previous years fee paying students have been identified as those students with any fee paying unit of study. For 2005 data, this definition resulted in 15,389 domestic undergraduate fee paying students, or 3% of all domestic undergraduate students. The definition has been changed to report on **full** fee paying students (full fee paying students include students where all their units of study are fee paying). This definition provides a more accurate measure of the number of students in a fee paying place. To illustrate the effect of this change in definition, in 2005 there were 15,389 domestic undergraduate fee paying students compared with 12,008 domestic undergraduate **full** fee paying students.
