Hello,

I am a media student in University of Melbourne, so glad to see the draft legislation about contract cheating, it is common phenomenon in uni and ruining honest students' works as well as the edu system.

Here are few advises, you can search "ghostwriter", "essay", "report" in different language on social media (e.g. instagram, WeChat), and show the consequence of cheating (anonymous) in public.

Furthermore, I am doing a project about contract cheating in Australian higher education, we are asked to do voice interview. Is it possible to do a phone or personal face-to-face interview with a staff?

The questions are about what government did and planning for future, as well as some ideas about this phenomenon. Its wouldn't take much time.

Sincerely,  
Eve
