

Please note: the substantive content of the 2026 NRI Roadmap Survey begins at Question 20 (with prior questions dealing with administrative and other information).

As such all submissions that are published include the responses submitted from Question 20 onwards only.

Q20.

Part 2: Research themes

2.1 NRI comprises the assets, facilities and associated expertise to support leading-edge research and innovation in Australia and is accessible to publicly and privately funded users across Australia and internationally. We are seeking your input on possible directions for future national-level investment - i.e., where the requirements are of such scale and importance that national-level collaboration and coordination are essential.

The [2021 Roadmap](#) used a challenge framework to support NRI planning and investment. With this in mind, consider likely future research trends in the next 5 - 10 years, and with respect to one or more of the 8 challenge areas identified in the 2021 Roadmap as listed below:

- describe emerging research directions and the associated critical research infrastructure requirements that are either not currently available at all, or not at sufficient scale and
- describe current national infrastructure requirements that you anticipate will no longer fit the definition of NRI in 5-10 years.

Do not limit your commentary to NCRIS funded capabilities.

Q21.

Resources Technology and Critical Minerals Processing

Q22.

Food and Beverage

Q23.
Medical Products

Q24.
Defence

Q25.
Recycling and Clean Energy

Q26.
Space

Q27.
Environment and Climate

Q28.
Frontier Technologies and Modern Manufacturing

Q29.

2.2 The 2024 statement of National Science and Research Priorities (NSRPs) includes outcomes linked to each priority to assist in identifying critical research needed in the next 5 to 10 years.

Consider the priority statements and, with respect to one or more of the 5 priority areas as listed below:

- describe emerging research directions and the associated critical research infrastructure requirements that are either not currently available at all, or
- not at sufficient scale and describe current national infrastructure requirements that you anticipate will no longer fit the definition of NRI in 5-10 years.

Do not limit your commentary to NCRIS funded capabilities, and where relevant, refer to the underpinning outcomes and research identified in the NSRPs document.

Q30.

Transitioning to a net zero future

Q31.

Supporting healthy and thriving communities

Q32.

Elevating Aboriginal and Torres Strait Islanders knowledge systems

The growing area of Indigenous knowledge is a vitally important Indigenous led innovation. This has the capacity to transform key areas of existing knowledge and practice. Ensuring that digital tools and data commons in this area is sophisticated, built for purpose and accessible.

Q33.

Protecting and restoring Australia's environment

Q34.

Building a secure and resilient nation

Culture is often overlooked as a vital area in social cohesion which underpins national resilience. The digital infrastructure needs of the HASS, Arts and Culture industries has been sadly neglected in government policy and the creation of research infrastructure. Researchers in these disciplines need well funding digital access to the collections of major museum and library institutions. Researchers in these areas are increasingly reliant on good digital data-base and web presentation tools and the lack of agreed data base platforms in these fields is undermining our capacity to tell our national stories to a wider public. We have been working closely with Sydney Informatics Hub (SIH) to solve some of these issues but have a national framework to make collections nationally available and tools for researchers in this field to share common resources and platforms is vital. Importantly many of the projects in these fields are designed to produce material that should be available to the wider community in perpetuity so attention to digital archiving and preservation of digital data is a sadly neglected part of our national infrastructure

Q35.

2.3 The case for a new NRI capability, or enhancements to existing capabilities, typically emerges through advocacy from research communities clustering around rigorously identified needs and goals. Such a concept could respond to a requirement for novel or expanded capacity within a domain, or across domains, and must be such that it could only be made available with national-level investment.

If you have identified such a requirement, briefly describe the need, the proposed infrastructure capability, the medium-term goals, impacted research communities, and the timeframe over which you advocate its establishment. Your response can include links to relevant existing reports.

Culture is often overlooked as a vital area in social cohesion which underpins national resilience. The digital infrastructure needs of the HASS, Arts and Culture industries has been sadly neglected in government policy and the creation of research infrastructure. Researchers in these disciplines need well funding digital access to the collections of major museum and library institutions. Researchers in these areas are increasingly reliant on good digital data-base and web presentation tools and the lack of agreed data base platforms in these fields is undermining our capacity to tell our national stories to a wider public. We have been working closely with Sydney Informatics Hub (SIH) to solve some of these issues but have a national framework to make collections nationally available and tools for researchers in this field to share common resources and platforms is vital. Importantly many of the projects in these fields are designed to produce material that should be available to the wider community in perpetuity so attention to digital archiving and preservation of digital data is a sadly neglected part of our national infrastructure

Q36.

Part 3: Industry perspectives

This section is seeking input specifically from industry-based respondents. Other respondents can skip this section.

Recommendation 6 of the [2021 Roadmap](#) related to improvements in industry engagement with NRI. To complement work on this topic that has occurred since then, we are seeking additional advice on NRI requirements as perceived by current or potential industry-based users.

Q37.

3.1 Have you (or your organisation) interreacted with or used Australia's NRI?

☐ Yes

☒ No

Q38.

3.2 If so, please briefly outline the NRI capabilities you (or your organisation) have interacted with or used. Do not limit your response to NCRIS capabilities.

This question was not displayed to the respondent.

Q39.

3.3 Please indicate your (one or more) primary reasons for interacting with NRI:

Q40.

3.4 If you answered no, please indicate your (one or more) primary reasons:

- ☐ I did not know about it
- ☐ Other facilities suit my needs better
- ☐ I would like to, but cannot get access due to geographical location
- ☐ I would like to, but believed that access was only available to academic researchers
- ☒ I am not aware of any capability that meets my needs
- ☐ Other (please specify)

Q41.

Part 4: Other comments

4.1 Please elaborate on any of your above responses or add any other comments relevant to the development of the 2026 Roadmap. Your response can include reference or links to existing reports that you recommend be considered during the 2026 Roadmap development process.

Q49.

4.2 Optional Document Attachment.

Note: Our strong preference is that answers are provided against the relevant questions in the survey. However, this file upload option is available for submissions in file format, where needed. Please ensure the document includes your name or organisation.
